“GAME for
EMPOWERED LEARNING ?”

learningDIRECTOR™

learningDIRECTOR™ is a unique template-based game and content development solution that allows you to create flash animations and highly interactive content at the click of a mouse. learningDIRECTOR™ is user-friendly and effective across industries and user levels.

learningDIRECTORTM is the product representation of our belief, Play to Learn. Our solution is to use interactivity and games to bridge the gap between the knowledge provider (expert) and the learner.

FEATURES

➤ Regular Updates

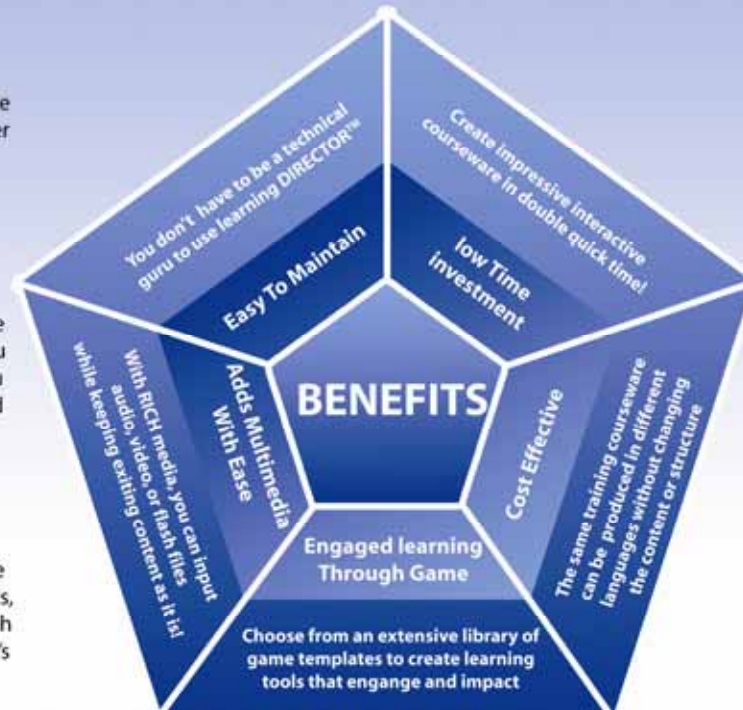

New interactive learning and game templates are added to the learningDIRECTOR™ library every month. Your courses will never go out of style.

➤ We allow Standards of Choice HTML, SCORM, LRM, AICC, IMS

Creating standards-compliant courseware enables you to reuse and track content. You don't have to start over again even if you change your learning management platform! We help you elevate your e-learning content to world-class benchmarks and best practices.

➤ Open Delivery and Cross Platform Support

The same content can be delivered through all or some of these medium - Mobile devices (including Tablet PCs, Pocket PCs, Mobile Phones), PCs, Laptops, CD-ROMs, etc. This gives you reach and widespread adoption by adapting with your learner's lifestyle preferences.

➤ Randomised Questions

We will ensure that no two tests will be the same - thus allowing for accurate testing and assessment, as well as making each learning experience for your learner unique and effective.

➤ Re-Use of Exciting Content and Media Assets

You don't have to throw away those useful learning assets that you spent money on, even though they may be dated. learningDIRECTOR™ allows you to upload all types of media files - image, audio, flash and even video.

➤ Live File Size Counter

A live file size counter allows the content author to control the size of content created so that you can upload your own image, sound, video and flash with ease by keeping file size at reasonable downloadable level.

➤ Multilingual Support

The same training courseware can be produced in different languages without changing the content or structure!
